[REPRINTS AND PERMISSIONS](#)

**1. Scope**

1.1 This specification is intended to prescribe minimum safety requirements for candles to provide a reasonable degree of safety for normal use with candles, thereby reducing fires, deaths, and injuries.

1.2 This specification is not intended to replace other important safety practices such as adult supervision, close monitoring, fire detection, alarm or suppression systems, or combustible materials.

1.3 This specification is used to measure and describe the response of materials, products, or assemblies to heat and flame under controlled conditions, but does not by itself incorporate all factors required for fire hazard or fire risk assessment of the materials, products, or assemblies under actual fire conditions.
