# About World Candle Month

Dear Partner,

September marks World Candle Month, a celebration established by [National Candle Association](#) (NCA) to bring to light the various ways candles enrich our daily lives and to promote the safe use of candles. The annual event brings together candle lovers from around the world. World Candle Month is just one of the many ways NCA encourages industry collaboration to promote global awareness of candle safety and the benefits of candles.

This year's World Candle Month theme is "*Candle with Confidence*". Below you will find ideas and safety tips to celebrate with us all month long.

In your social media posts, be sure to use #WorldCandleMonth. If your company is having any upcoming initiatives or promotions, please feel free to reach out.

NCA is also working with a syndicated service to promote our month-long candle celebration. This will be shared with media outlets, influencers, and industry publications at the start of September to kick off the event.

Thank you,

Brad Root  
President  
National Candle Association

Matthew Mantione  
Executive Director  
National Candle Association

# World Candle Month Partners

The National Candle Association (NCA), founded in 1974, is the major trade association representing U.S. candle manufacturers and their suppliers. The mission of the National Candle Association is to serve and represent its candle manufacturing members of the United States of America and their suppliers, and to promote safe products and a healthy environment for the industry. Headquartered in Washington, DC, NCA has more than 100 candle manufacturers and suppliers as members and is widely recognized as the leading technical authority on candle manufacturing, science, and safety.

The Latin American Candle Manufacturers Association – ALAFAVE – was created in 1999 as a non-profit association by a group of candle manufacturers and suppliers to the candle industry. The goals of ALAFAVE are: to promote the Latin American candle industry through the sponsorship of digital publications and of conferences where the exchange of technical, market and regulatory information among its members takes place; to promote the production of quality candles and the safe use of candles in the region; to strengthen the integration of the Latin American candle industry in today's global economy.

The European Candle Manufacturers Association (ECMA) is the collective voice for the leading candle manufacturers and suppliers to the candle industry in Europe. Priorities are quality, research, standardization and compliance – and to offer safe and beautiful candles consumers can enjoy. ECMA was founded in 2021 when the former Association of European Candle Makers and European Candle Association joined forces.
